Subject: Back-check of Comments to draft Comp Phase 1 Report
Comp P1 Report comments_combined.docx

Hi Robyn,

As discussed, for a back-check by USACE, please find attached the comment letter for the draft Comprehensive Phase 1 Report for OU-1 of the West Lake Landfill. The attached version of the comments includes comments and input from EPA, USACE and MDNR into a single comment letter. USACE provided review comments to EPA for this report on January 14, 2016, and EPA and USACE discussed the combined comments via teleconference on January 22, 2016. As discussed on the teleconference some of the USACE comments were modified or not included in the combined comment letter. Specifically, comments #20, #22, #23, #24 and #27 were not included in the attached combined comment letter, mainly due to EPA already including a similar comment.

Please back-check the attached combined comment letter with your team and provide me or Brad questions or additional input as warranted. To support the project schedule, EPA plans to distribute these comments to EMSI next week, so timely feedback from USACE on this information is greatly appreciated.

Please note that the attached comment letter document has not received final formatting or other checks by our tech editor or senior staff, thus additional edits may occur by EPA during/following tech editing and final reviews. Although it is not currently anticipated, EPA will plan to communicate with USACE regarding any significant changes made to the comment letter, if any should occur.

Thanks for the help and support,

Justin L. Barker
